

MULTIPLICACIÓN POR 0 – 1 – 2 - 3

O sea:

$1 \times 0 = \dots\dots\dots$

$2 \times 0 = \dots\dots\dots$

$3 \times 0 = \dots\dots\dots$

$4 \times 0 = \dots\dots\dots$

$5 \times 0 = \dots\dots\dots$

$6 \times 0 = \dots\dots\dots$

$7 \times 0 = \dots\dots\dots$

$8 \times 0 = \dots\dots\dots$

$9 \times 0 = \dots\dots\dots$

Entonces:

$2 \times 1 = \dots\dots\dots$

$3 \times 1 = \dots\dots\dots$

$4 \times 1 = \dots\dots\dots$

$5 \times 1 = \dots\dots\dots$

$6 \times 1 = \dots\dots\dots$

$7 \times 1 = \dots\dots\dots$

$8 \times 1 = \dots\dots\dots$

$9 \times 1 = \dots\dots\dots$

En un corral hay 9 gallinas, sabiendo que cada gallina tiene 2 patas. ¿Cuántas patas contamos en total?

TABLA DEL 2

$2 \times 1 = \dots\dots\dots$

$2 \times 2 = \dots\dots\dots$

$2 \times 3 = \dots\dots\dots$

$2 \times 4 = \dots\dots\dots$

$2 \times 5 = \dots\dots\dots$

$2 \times 6 = \dots\dots\dots$

$2 \times 7 = \dots\dots\dots$

$2 \times 8 = \dots\dots\dots$

Sabiendo que cada mototaxi tiene 3 llantas. ¿Cuántas llantas contamos en 7 mototaxis?

TABLA DEL 3

$3 \times 1 = \dots\dots\dots$

$3 \times 2 = \dots\dots\dots$

$3 \times 3 = \dots\dots\dots$

$3 \times 4 = \dots\dots\dots$

$3 \times 5 = \dots\dots\dots$

$3 \times 6 = \dots\dots\dots$

$3 \times 7 = \dots\dots\dots$

$3 \times 8 = \dots\dots\dots$

∴ Hay: $3 + 3 + 3 + 3 + 3 + 3 + 3 =$ x $=$ llantas.

TRABAJANDO EN EL AULA

1. Escribe los factores que faltan:

• $4 \times \quad = 12$

• $7 \times \quad = 14$

• $8 \times \quad = 24$

• $\quad \times 2 = 12$

• $\quad \times 3 = 18$

• $\quad \times 2 = 8$

• $\quad \times 3 = 15$

• $\quad \times 2 = 10$

• $\quad \times 3 = 21$

2. Completa en cada caso:

• $8+8 = \dots \times \dots = \dots$

• $7+7+7 = \dots \times \dots = \dots$

• $5+5 = \dots \times \dots = \dots$

• $8+8+8 = \dots \times \dots = \dots$

• $6+6 = \dots \times \dots = \dots$

• $5+5+5 = \dots \times \dots = \dots$

• $7+7 = \dots \times \dots = \dots$

• $6+6+6 = \dots \times \dots = \dots$

• $9+9 = \dots \times \dots = \dots$

• $4+4+4 = \dots \times \dots = \dots$

3. Colorea el casillero donde está el producto correcto:

3×2	6	7	8
9×3	21	27	24
4×2	4	6	8

0×3	0	3	6
5×2	8	10	12
3×3	6	7	9

4. ¿Cuántos cuadraditos pequeños hay en cada figurita?

$\quad \times \quad = \dots$

$\quad \times \quad = \dots$

x =

x =

5. Halla los productos.

• $\begin{array}{r} \boxed{3} \boxed{2} \boxed{4} \\ \hline \end{array} \times$
 $\begin{array}{r} \square \\ \square \\ \square \end{array}$

• $\begin{array}{r} \boxed{5} \boxed{2} \boxed{1} \\ \hline \end{array} \times$
 $\begin{array}{r} \square \\ \square \\ \square \end{array}$

• $\begin{array}{r} \boxed{9} \boxed{0} \boxed{6} \\ \hline \end{array} \times$
 $\begin{array}{r} \square \\ \square \\ \square \end{array}$

• $\begin{array}{r} \boxed{4} \boxed{2} \boxed{1} \\ \hline \end{array} \times$
 $\begin{array}{r} \square \\ \square \\ \square \end{array}$

• $\begin{array}{r} \boxed{1} \boxed{5} \boxed{3} \\ \hline \end{array} \times$
 $\begin{array}{r} \square \\ \square \\ \square \end{array}$

• $\begin{array}{r} \boxed{6} \boxed{0} \boxed{8} \\ \hline \end{array} \times$
 $\begin{array}{r} \square \\ \square \\ \square \end{array}$

• $\begin{array}{r} \boxed{3} \boxed{0} \boxed{2} \boxed{1} \boxed{4} \boxed{2} \boxed{6} \boxed{2} \boxed{9} \\ \hline \end{array} \times$
 $\begin{array}{r} \square \\ \square \\ \square \\ \square \\ \square \\ \square \\ \square \\ \square \end{array}$

• $\begin{array}{r} \boxed{1} \boxed{0} \boxed{2} \boxed{4} \boxed{8} \boxed{0} \boxed{9} \boxed{3} \boxed{6} \\ \hline \end{array} \times$
 $\begin{array}{r} \square \\ \square \\ \square \\ \square \\ \square \\ \square \\ \square \\ \square \end{array}$

TAREA PARA MI...

1. Escribe los factores que faltan:

• $6 \times \quad = 12$

• $7 \times \quad = 35$

• $\quad \times 2 = 18$

• $7 \times \quad = 28$

• $8 \times \quad = 16$

• $\quad \times 3 = 15$

2. Completa en cada caso:

• $4+4 = \dots \times \dots = \dots$

• $3+3+3 = \dots \times \dots = \dots$

• $3+3 = \dots \times \dots = \dots$

• $2+2+2 = \dots \times \dots = \dots$

• $2+2 = \dots \times \dots = \dots$

• $9+9+9 = \dots \times \dots = \dots$

3. Colorea el casillero donde está el producto correcto.

6×3	12	15	18
5×2	7	10	12
5×3	15	12	18

9×2	18	16	14
7×3	24	21	18
8×2	18	14	16
